

Cloud reinvented

A powerhouse partnership that offers unique, full-stack capabilities and expertise

A powerhouse partnership for complete cloud-to-edge solutions

Accelerate your cloud journey with access to NTT DATA's full information and communications technology (ICT) stack of services, coupled with the experience and depth of Dell Technology infrastructure and technology solutions. Together, we can provide you with access to a complete cloud-to-edge solution and give you the benefits of greater purchasing power and efficiencies, as well as economies of scale.

Your partners for proven, sustainable solutions

Our joint solutions and expertise, combined with consistent global delivery, enable you to run your operations more efficiently and speed up time to market.

We can help you to:

-  Control cloud spending and use resources more efficiently
-  Simplify the management of your organization's digital footprint
-  Balance your investments in modern technologies while maximizing the value of existing applications
-  Build a secure cloud environment, with integrated security from the edge, across the network and to the application

What you stand to gain

Efficiency and performance

- Reduced costs
- Increased scalability
- Improved productivity

Innovation

- Next-generation technologies
- New revenue opportunities
- Better user experiences

Control

- Control cloud spend
- Use resources more efficiently

Cloud compliance

- Optimal reliability in cloud environments
- Meet all compliance requirements

Security across the stack

- Stronger governance and maturity

NTT DATA and Dell Technologies: a solutions powerhouse

NTT DATA is a Dell Technologies Titanium Black partner

We are part of an elite group of Dell's most strategic partners.

World-leading global innovators

Our partnership enables us to deliver innovation as a service.

We provision the infrastructure you need quickly, and enable you to scale on demand and pay as you go across your entire multicloud environment.

Innovation for sustainable businesses

Our vision of contributing to a sustainable society aligns with Dell Technologies' purpose of creating technologies that drive human progress.

We can help you build business cases that deliver efficiencies and release investment for innovation. And with our solutions and expertise, you'll be able to run your operations more efficiently to reduce emissions and protect your brand.

Industry-specific solutions

With a deep understanding of our clients' industries and extensive R&D capabilities, we can deliver solutions for a range of sectors.

We are known for our expertise in the healthcare, finance, manufacturing, pharmaceutical and biomedical sectors, among others.

Investment in human expertise

We have the expertise to help you meet your challenges head on, at every stage of your cloud journey.

Both NTT DATA and Dell Technologies invest heavily in our people in areas such as consulting, technology management and security.

Certainty in an uncertain world

Our ongoing investment in infrastructure and innovation ensure our success and sustainability- and yours.

NTT DATA is part of the Japanese conglomerate, NTT Group, one of the world's largest and most respected brands. We are a company built on delivering on our commitments to our people, our clients and society.
