Implementation Services

For successful technology implementations

Reduce risk, minimize business disruption and accelerate time to value with world-class technical expertise and industry experience.

Our industry-certified, cross-domain and technology implementation experts help you deploy and integrate technology solutions into your environment.

Unlock the business outcomes of your technology investments with our global skills and proven methodologies.

Guided by the high- and low-level design blueprints we create in the design phase of our engagement, we use industry-proven, world-class deployment methodologies to ensure a risk free and seamless deployment into your environment.

How we deliver

We evaluate your environment to:

- Determine the most appropriate implementation approach, aligned to the client service validation and change and release cycles
- Minimize implementation risks in single-or multiple-provider environments
- Understand any health and safety considerations, where applicable

Project and program management controls govern the delivery of the project, with stakeholder identification, implementation and communication plans to ensure successful deployment.

Where required, the implementation may require and include the following services:

- Site surveys
- Staging
- Rack and stack
- Full configuration
- In-service validation
- Knowledge transfer

Technology deployment strategies

Our technology deployment strategies include automation, zero-touch provisioning, subscription (software) and feature activations to ensure the implementation meets your desired outcomes.

Implementation services

To support you on your technology modernization and digital transformation journey, we offer expertise in traditional infrastructure and next-generation technology implementation.

We can implement on-premises and hybrid technology configurations, cloud- and controller-based infrastructure or use the central management capabilities of leading vendor platforms.

Global and local skills

As a systems integrator and technology partner with global scale and diverse skills, we can offer your technology modernization project a choice of central, global, local or hybrid implementation teams – and a consistent delivery experience, wherever you are.

> As the technology industry moves from pure hardware-delivered solutions to software-defined, **our expert teams can help you implement a best-of-breed solution covering all vendors in your environment.**

Business outcomes and benefits

Reduced risk and accelerated time to value for technology investments
Use our multivendor and multitechnology implementation experience to reduce risk and decrease the time it takes to realize the value of your technology.

Seamless integration and operational handover
As part of the implementation, we ensure that the operational support teams (NTT DATA or your internal teams) are fully enabled to support the solution.

Global consistency in delivery
We use the same approach to execute projects and ensure quality outcomes anywhere in the world.

Offload technology implementation tasks from in-house staff
Minimize disruption to your day-to-day operations by offloading implementation tasks to skilled, external resources.

Key features

Flexible service capabilities to suit your individual requirements.

Access to global expertise
You'll be working with highly skilled resources who have implemented your solution in complex environments in a wide variety of industries. With delivery professionals in every region, we can ensure global consistency – and give you the best resources available for your project.

Best-practice implementations
Our Implementation Services are based on proven technology reference architectures and use cases, leveraging industry-leading models and methodologies.

Multivendor architectural approach
We have expertise, skills and certifications across a broad array of hardware and software vendors.

Why NTT DATA

Specialized expertise
More than 3,000 technical experts with a combined total of more than 11,000 certifications.

Proven methodology
Standardized global methodology based on more than 30 years of experience.

Multivendor support
Skills and certifications for a broad array of hardware and software vendors.

Your service, your way
Choose one or several implementation options, or use our end-to-end implementation service, from staging through to knowledge transfer.
